

**Engine oil**

With the engine at operating temperature and turned off, check the oil level on the dipstick.

**■ Checking the engine oil**

- 1 Park the vehicle on level ground. After warming up the engine and turning it off, wait more than 5 minutes for the oil to drain back into the bottom of the engine.
- 2 Holding a rag under the end, pull the dipstick out.
  - ▶ 2.5 L 4-cylinder (A25A-FKS) ▶ 3.5 L V6 (2GR-FKS) engine

- 3 Wipe the dipstick clean.
- 4 Reinsert the dipstick fully.
