

### Lubrication system

#### ■ Oil capacity (Drain and refill [Reference\*])

	With filter	Without filter
2.5 L 4-cylinder (A25A-FKS) engine	4.8 qt. (4.5 L, 4.0 Imp. qt.)	4.4 qt. (4.2 L, 3.7 Imp. qt.)
3.5 L V6 (2GR-FKS) engine	5.7 qt. (5.4 L, 4.8 Imp. qt.)	5.6 qt. (5.3 L, 4.7 Imp. qt.)

\*: The engine oil capacity is a reference quantity to be used when changing the engine oil. Warm up and turn off the engine, wait more than 5 minutes, and check the oil level on the dipstick.

#### ■ Engine oil selection

##### ▶ 2.5 L 4-cylinder (A25A-FKS) engine

“Toyota Genuine Motor Oil” is used in your Toyota vehicle. Use Toyota approved “Toyota Genuine Motor Oil” or equivalent to satisfy the following grade and viscosity.

Oil grade: ILSAC GF-6B multigrade engine oil

Recommended viscosity: SAE 0W-16

SAE 0W-16 is the best choice for good fuel economy and good starting in cold weather.

If SAE 0W-16 is not available, SAE 0W-20 oil may be used. However, it must be replaced with SAE 0W-16 at the next oil change.

Oil viscosity (0W-16 is explained here as an example):

- The 0W in 0W-16 indicates the characteristic of the oil which allows cold startability. Oils with a lower value before the W allow for easier starting of the engine in cold weather.
- The 16 in 0W-16 indicates the viscosity characteristic of the oil when the oil is at high temperature. An oil with a higher viscosity (one with a higher value) may be better suited if the vehicle is operated at high speeds, or under extreme load conditions.
