**◆ Registering ID codes**

---

**▶ Vehicles without a tire inflation pressure display function**

Every tire pressure warning valve and transmitter has a unique ID code. In addition to the set of tire pressure warning system sensor ID codes initially registered to the vehicle, a second set of ID codes can be registered.

A second set of tire pressure warning system sensor ID codes can be registered at your Toyota dealer. When 2 sets of ID codes have been registered, either ID code set can be selected.

**▶ Vehicles with a tire inflation pressure display function**

Every tire pressure warning valve and transmitter has a unique ID code. When replacing a tire pressure warning valve and transmitter, it is necessary to register the ID codes.

The ID codes can be registered on  (4.2-inch display) or  (7-inch display) of the multi-information display.

**■ Changing the available set of ID codes (vehicles without a tire inflation pressure display function)**

When 2 sets of ID codes are registered, the corresponding ID code set for the installed wheels can be selected on  (4.2-inch display) or  (7-inch display) of the multi-information display. It is not necessary to reregister the ID codes each time the wheels are changed.

For information regarding changing the registered ID codes for an ID code set, contact your Toyota dealer.
