

- Instances of the Blind Spot Monitor unnecessarily detecting a vehicle and/or object may increase under the following conditions:
 - When there is only a short distance between your vehicle and a guard-rail, wall etc.
 - When there is only a short distance between your vehicle and a following vehicle.
 - When vehicle lanes are narrow and a vehicle driving 2 lanes across from your vehicle enters the detection area

■ The outside rear view mirror indicators visibility

When under strong sunlight, the outside rear view mirror indicator may be difficult to see.

■ When there is a malfunction in the system

If a system malfunction is detected due to any of the following reasons, warning lights will turn on: (→P. 421)

- There is a malfunction with the sensors
- The sensors have become dirty
- The outside temperature is extremely high or low
- The sensor voltage has become abnormal

■ Certification for the Blind Spot Monitor

FCC ID: OAYBSDTX

This device complies with part 15 of the FCC Rules. Operation is subject to the following three conditions:

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation.
- (3) This device may only work when the vehicle is in operation pursuant to § 15.252 (a) (4).

FCC WARNING

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
