

USB charging ports

The USB charging ports are used to supply 2.5 A (USB Type-A port) or 3.0 A (USB Type-C port) of electricity at 5 V to external devices. The USB charging ports are for charging only. They are not designed for data transfer or other purposes.

Depending on the external device, it may not charge properly. Refer to the manual included with the device before using a USB charging port.

■ Using the USB charging ports

Open the console box lid and open the lid.

■ The USB charging ports can be used when

Vehicles without a smart key system:

The engine switch is in the "ACC" or "ON" position.

Vehicles with a smart key system:

The engine switch is in ACCESSORY or IGNITION ON mode.

■ Situations in which the USB charging ports may not operate correctly

- If a device which consumes more than 2.5 A at 5 V (USB Type-A port) or 3.0 A at 5 V (USB Type-C port) is connected
- If a device designed to communicate with a personal computer, such as a USB memory device, is connected
- If the connected external device is turned off (depending on device)
- If the temperature inside the vehicle is high, such as after the vehicle has been parked in the sun

■ About connected external devices

Depending on the connected external device, charging may occasionally be suspended and then start again. This is not a malfunction.
