

- In some situations such as the following, sufficient braking force or steering force may not be obtained, preventing the system from performing properly:
 - If the braking functions cannot operate to their full extent, such as when the brake parts are extremely cold, extremely hot, or wet
 - If the vehicle is not properly maintained (brakes or tires are excessively worn, improper tire inflation pressure, etc.)
 - When the vehicle is being driven on a gravel road or other slippery surface
 - When the road surface has deep wheel tracks
 - When driving on a hill road
 - When driving on a road that has inclines to the left or right
- **If VSC is disabled**
 - If VSC is disabled (→P. 324), the pre-collision brake assist and pre-collision braking functions are also disabled.
 - The PCS warning light will turn on and “VSC Turned Off Pre-Collision Brake System Unavailable” will be displayed on the multi-information display.
