

Displays and buzzers for engine output restriction control and brake control

If the engine output restriction control or brake control operates, a buzzer will sound and a message will be displayed on the multi-information display to alert the driver.

Depending on the situation, engine output restriction control will operate to either limit acceleration or restrict output as much as possible.

Control	Situation	Multi-information display	PKSB OFF Indicator	Buzzer
Engine output restriction control is operating (acceleration restriction)	Acceleration greater than a certain amount is not possible.	"Object Detected Acceleration Reduced"	Not illuminated	No beep
Engine output restriction control is operating (output restricted as much as possible)	Stronger-than-normal brake operation is necessary.	"Brake!"	Not illuminated	Short beep
Brake control is operating	Emergency braking is necessary.			
Vehicle stopped by system operation (When accelerator is stepped on)	The vehicle has been stopped by brake control operation.	"Switch to Brake"	Illuminated	Short beep
Vehicle stopped by system operation (When accelerator is not stepped on)	The vehicle has been stopped by brake control operation.	"Brake"	Illuminated	Short beep
